JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 113, Numbers 1–2, 1 January 2000

Contents

Preface ix

R.P. Agarwal and D. O'Regan
Some new results for singular problems with sign changing nonlinearities 1

A. Cabada and J.J. Nieto
Fixed points and approximate solutions for nonlinear operator equations 17

I. Rachůnková
Existence of two positive solutions of a singular nonlinear periodic boundary value problem 27

J. Banaś, J.R. Rodriguez and K. Sadarangani
On a class of Urysohn–Stieltjes quadratic integral equations and their applications 35

N. Halidias and N.S. Papageorgiou
Existence of solutions for quasilinear second order differential inclusions with nonlinear boundary conditions 51

S.P. Singh, E. Tarafdar and B. Watson
A generalized fixed point theorem and equilibrium point of an abstract economy 65

J. Andres and B. Krajc
Bounded solutions in a given set of differential systems 73

S. Park
Acyclic versions of the von Neumann and Nash equilibrium theorems 83

A. Prástaro and T.M. Rassias
A geometric approach of the generalized d'Alembert equation 93

R. Johnson, M. Kamenskii and P. Nistri
Bifurcation and multiplicity results for periodic solutions of a damped wave equation in a thin domain 123

W.A. Kirk and L.M. Saliga
Some results on existence and approximation in metric fixed point theory 141

X.P. Ding and C.L. Luo
Perturbed proximal point algorithms for general quasi-variational-like inclusions 153

P.J.Y. Wong and R.P. Agarwal
Fixed-sign solutions of a system of higher order difference equations 167

R.P. Agarwal and D. O'Regan
Existence criteria for operator inclusions in abstract spaces 183

V. Lakshmikantham and A.S. Vatsala
Existence of fixed points of fuzzy mappings via theory of fuzzy differential equations 195

L. Sanchez
A note on a nonautonomous O.D.E. related to the Fisher equation 201

A. Simon
Some existence results for quasi-linear elliptic problems via the fixed-point theorem of Tarski 211

C. Cuevas and M. Pinto
Asymptotic behavior in Volterra difference systems with unbounded delay 217

P.J.Y. Wong and R.P. Agarwal
Eigenvalue theorems for discrete multipoint conjugate boundary value problems 227

M. Furi, M.P. Pera and M. Spadini
Forced oscillations on manifolds and multiplicity results for periodically perturbed autonomous systems 241

L. Berezansky and E. Braverman
On oscillation of a logistic equation with several delays 255

R. Precup
Discrete continuation method for boundary value problems on bounded sets in Banach spaces 267

H. Ben-El-Mechaiekh
Spaces and maps approximation and fixed points 283

M.-P. Chen and K.-K. Tan
A noncompact generalized quasi-variational inequality 309

C. De Coster and P. Habets
Existence and multiplicity of positive solutions of the Ginzburg–Landau boundary value problem 317

M. García-Huidobro, R. Manásevich and C.S. Yarur
Existence of positive singular solutions for a class of quasilinear elliptic equations 329

C.Y. Chan and J. Yang
Complete blow-up for degenerate semilinear parabolic equations 353

L. Erbe, A. Peterson and R. Mathsen
Existence, multiplicity, and nonexistence of positive solutions to a differential equation on a measure chain 365

J.V. Baxley and J.C. Martin
Positive solutions of singular nonlinear boundary value problems 381

B. Ricceri
A general variational principle and some of its applications 401
